

ADC System Services brings the power of myCOOP™ Business Continuity Software to your planning process. No matter how long you've been in the field, we understand that Business Continuity Planning is a daunting task. For the experienced planner, it takes months to get standards in place, published and coordinated even when you're just trying to get two areas to draw up their plans, let alone an entire organization. For the novice planner, you may not know where to begin but you do know that it will take communication and coordination to get everyone involved to help build your enterprise plan. myCOOP helps both the experienced and novice planner through the planning process. myCOOP gives you ease-of-use, low cost and planning consistency. For the experienced planner, that means that you will have a centralized site to store your standardized plans and methods to monitor progress as each area completes their tasks. For the novice planner, myCOOP delivers industry standard aids to get you started.

Here are some of the features that all planners can take advantage of:

- **Complete**—Full set of templates, processes, and model team plans covering all the Professional Practices as outlined by the Disaster Recovery Institute International (DRII).
- **Ease-of-use**—Portal access for all functions, allowing intuitive user interaction. If you know how to use Explorer, you'll find myCOOP very easy to use.
- **Quick install**—Imports and uses existing plans to quickly populate document libraries.
- **Flexibility**—Change all aspects of the system on the fly from a browser.
- **Reliability**—Operating System level security is managed by MS Server 2000.
- **Affordability**—Cost that is much less than other continuity planning software.
- **Document management**—Features options like check in/check out, publish and version control of documents managed by your website.
- **Scalability**—myCOOP's architecture will support thousands of users.
- **Task planning**—Enables team leaders to publish major tasks and display them on your website.
- **Discussion board**—Automates a discussion board (bulletin board) of *parking lot* items from your planning meetings.
- **Electronic surveys**—Collects/analyzes and exports surveys from respondents.
- **Marquees**—Displays announcements and events pertinent to your DR/BCP effort.
- **Links**—Lists web links to websites useful to users of your DR/BCP website.
